WHOLESALE TRADE LIST  
*For Nurserymen, Florists and Landscapers*

**Important Notice!** File this catalog for your 1939 spring orders. Our next list will not be mailed until Fall, 1939.

## IMPORTANT TO THE TRADE

**OUR BUSINESS**—The Sherwood Nursery Co. are propagators and growers of evergreen trees and shrubs, specializing in the production of conifers and broad leaved evergreens. We have put into this business the skill and experience of expert nurserymen, and own and operate the most efficient propagating plant in the United States devoted exclusively to the propagation of evergreens.

**SOIL AND CLIMATE**—This skill and experience, coupled with a soil and climate that cannot be excelled for the growing of plants, has resulted in a product that is sure to please. Our soil is just right, free from peat, producing a fine vigorous root system, making a plant that is easy to move. The soil and climate conditions combine in the larger plants to produce a wealth and luxuriance of foliage that cannot be surpassed. Most seasons plants can be dug and shipped from our nursery every month of the year except July and August.

**QUALITY OF STOCK**—The Sherwood Nursery Co. stands back of all stock sold. A constantly increasing list of satisfied customers testifies to the quality of our stock and business methods. While no guarantee is given, many of our plants will withstand any reasonable degree of cold and all have been tested to a temperature of at least zero weather under certain conditions.

All stock offered in this list is our own production.

**LOCATION**—Our nurseries are located at Portland, Oregon, at the foot of the Cascade Mountains, with the snowy peaks of Mt. Hood and St. Helens plainly visible from our office windows, and where nature has made conditions favorable for plant production. Favored as we are, we can compete in price and quality with plants grown anywhere. Portland is one of the leading truck and railroad centers of the Pacific coast, reached by main lines north, east, south, and west, with water grade transportation up the Columbia River eastward. Car lots can be shipped to the Atlantic coast in 10 days so that there is no danger of loss of plants.

Visitors are always welcome. If at all possible come and see our stock. It speaks for itself.

*We contract to propagate in our lines. If interested write for prices and particulars, indicating your needs.*

### TERMS:

### TERMS AND INFORMATION

Cash with order. Prices F. O. B. Portland.

To guarantee the reservation of stock for future fall or spring delivery, one-fourth of the purchase price should accompany the order. No order will be booked without a deposit of at least 25 per cent. Cash in full must accompany foreign shipments, and there will be a charge of \$1.00 to cover cost of inspection.

C. O. D. orders must be accompanied by one-fourth cash before shipment can be made. Shipments will not be made C. O. D. by parcel post. Enclose postage for parcel post shipments. Positively no order for rooted cuttings or lining out stock will be accepted for less than 25 plants of the same size and variety.

Prices quoted in the 10, 100, or 1000 lots apply to one size and one variety only.

We reserve the right to substitute grades when necessary and the difference is not too great.

### PACKING:

No packing charge will be made when the method of packing is left to our judgment.

Many small balled grades can be safely shipped, packed bare roots in moss and cut down shipping costs.

### RESPONSIBILITY:

All the stock offered by this Company is grown out of doors and in their own fields with the greatest care and packed in like manner and we make no guarantee, either expressed or implied that the plants will grow or give specific results. Upon proper proof, any plants untrue will be replaced, or any miscounted will be corrected. It is mutually agreed that our responsibility is limited to the original price paid. Complaints must be made within 5 days after receipt of plants. All shipments are at the risk of purchaser after being delivered in good condition to the carrier.

### SHIPPING DIRECTIONS:

Give explicit directions stating whether stock is to be shipped by rail, auto freight or boat, parcel post or express. In the absence of advice we use our best judgment.

### NOTE:

We accept all orders upon condition that they shall be void should frost, storm, crop failure or other cause result in injury or destruction of stock, or in inability to deliver.

**SHERWOOD NURSERY COMPANY**

**141 S. E. 65th Ave., Portland, Oregon**

### TO REACH NURSERY:

Drive east on East Stark Street highway to Southeast 72nd Avenue.

OR, drive east on East Burnside to Southeast 73rd Avenue.

Nursery is reached in a fifteen minute drive from the center of city by either one of these two main highways leading eastward.

A shrub of rounded type of growth, attaining a height of four to five feet. Unique and picturesque. Has rather small, round, thick leaves of grayish silver tone, and reddish brown bark that scales off in flakes. A hardy, rugged little mountain shrub that is just different. The flowers, which grow in nodding clusters, are white and pink. Native of the Cascades.

Rooted cuttings, not transplanted. (Ready spring shipment)	\$ .....	\$ .....	\$ 6	\$ 45
1- 2 inches once transplanted.....	-----	-----	7	-----
2- 4 "	-----	-----	8	-----

A low-growing, broad leaf evergreen, 18 to 24 inches tall, with an interesting spreading habit of growth. The leaves, which have a delightful appearance of freshness, are about the size of a quarter of a dollar and almost as round. Is most impressive when grown in masses as it grows on our Oregon mountain slopes, where it is native. Retains its refreshing greenness under exceedingly dry and trying conditions.

Rooted cuttings, not transplanted. (Ready spring shipment)	.....	.....	6	45
--	-------	-------	---	----

Sometimes called Bear Berry. A lovely low trailing evergreen, flourishing in a wide range of latitude and altitude. In Oregon it is at home from the splash of the waves of the Pacific to timberline in the Cascade mountains. Withstands almost any degree of cold. Has large brilliant red berries, roundish glossy leaves and grows in thick masses, completely covering the ground, rocks, walls or old logs over which it trails. Exempt from pests, good the year round and in every respect decidedly pleasing and satisfying. Considered by some to be the best ground cover known.

Rooted cuttings, not transplanted. (Ready spring shipment) .....	5	38
2- 4 inches once transplanted.....	6	45
4- 6 " " ".....	7	53

Leaves large, glossy, dark green splashed with gold. Hardy and resistant to smoke and dust. The variegated foliage gives this plant a bright cheerful aspect and since it thrives best in deep shade it is a most useful evergreen, for brightening dark, shady corners difficult to landscape. Grows five to six feet tall.

5 of same variety and size at 10 rate; 25 at 100 rate; 250 at 1000 rate. B&B signifies balled and burlapped.

**Azalea schlippenbachi** (Royal Azalea)

Slow growing. Has broad, green foliage, especially attractive in the bronze shade of the new growth. Flowers are varying shades of pink and are immense in size, being three inches across. Thrives best in partial shade, and for this reason fills a need among deciduous azaleas.

**Azalea sherwoodi** (Sherwood Orchid Azalea)

This is a hybrid hinodegiri and our own introduction. The flowers are a fascinating and beautiful orchid in color. It has been awarded a prize in a rare plant exhibit. We have been developing and trying it out for several years in our nursery where it has attracted much attention from visitors. Foliage about the size and gloss of the Hinodegiri Crimson Azalea, hardy anywhere the hinodegiri is hardy, a profuse bloomer, blooms completely covering the plant, and are large for a dwarf azalea. Flowers are a clear lavender with a speckled throat. This azalea fills a need which has not been met by any other azalea. Although showy it harmonizes with other colors in the garden.

**Berberis julianae** (Wintergreen Barberry)

One of the best upright barberries. The leaves are large, foliage heavy and the thorns which are long and sharp, are well hidden by the foliage. Some of the leaves remain green through the winter, others turn brilliant scarlet and are mingled among the green leaves in the fall and winter in a most showy and attractive manner.

Calluna vulgaris rubra (Red Heather)

The Red Heather is new and may still be considered a rare plant. When in bloom there is nothing visible but the blossoms, which are a rich, purplish-red. It is such a brilliant display of flowering beauty in mid-summer that visitors to our nursery from far and near have been amazed at its superb beauty and have been unstinted in their praise. It is hardy and grows about eighteen inches tall. As in the case of the Darley Heath and Irish Bell Heather, we cannot say too much for this matchless gem of the garden. Its blooms are especially welcome, coming at a season when there is but little competition in blossoming shrubs.

The improved brooms, which are of both American and English origination, are among the most popular of recent introductions in the garden. For rich, gorgeous coloring and varying shades and tints in the different varieties they have no equal. Among the flowers may be found white, purple, crimson, orange, yellow, bronze, cream, mahogany, pink or combinations of these that are unsurpassed. In habit of growth they range from low trailers to tall upright types. Some of them will withstand a low degree of temperature and all will grow under adverse conditions and thrive under more neglect than most shrubs. They should be included in practically all plantings. We call attention to our fine list. They are classified in this list under both Cytisus and Genista.

Cytisus scoparius—

POMONA—

Choice fancy broom. The description of the flower is as follows: Standards, yellow; wings, amber-orange; keel, yellow. General effect of the flower is brilliant copper in color. Tall vigorous grower. Our plants are strong, well rooted and easily handled. The brooms are constantly growing in favor, varying in size from trailing dwarfs to large shrubs and covering in brilliant coloring the range of the prismatic colors. Our methods of growing have enabled us to place the prices within the range of the buying public. The Pomona is one of the best.

STANFORD—

Choice, fancy broom. The description of its flower is as follows: Standards, bronze yellow; wings, bright orange-red; keel, golden

5 of same variety and size at 10 rate; 25 at 100 rate; 250 at 1000 rate. B&B signifies balled and burlapped.

yellow. General effect of the flowers is copper. Flowers large. The Stanford belongs in the same class as the Pomona. The plants are strong, well rooted, and the flowers are equally delightful. Like all of the choice brooms, it adds variety of color, interest and beauty to the planting.

Each 10

## Daboecia polifolia (Swedish Bell Heather)

## Daboecia polifolia alba (White Irish Bell Heather)

## Daboecia polifolia rosea (Pink Irish Bell Heather)

## Daphne cneorum (Rose Daphne)(Rock Daphne)

## Daphne odora (Winter Daphne)

**Desmodium—See Lespedeza**

## Dianthus caesius (Cheddar Pink)

5 of same variety and size at 10 rate; 25 at 100 rate; 250 at 1000 rate. B&B signifies balled and burlapped.

Draba olympica (Whitlowgrass)

Dainty evergreen rock plant, growing in low, mossy, symmetrical mounds, covered in spring with a blanket of yellow flowers. Words fail to describe the beauty of this gem from the high Olympic mountains. Without doubt, the most beautiful, miniature evergreen we know.

4- 6 "....."	.....	.....	8	.....

Erica mediterranea hybrida (Darley Heath)(Also called Hybrid Heath, Christmas Heath or Winter Heather)

This is one of the most attractive and desirable plants grown in our nursery. It is hardy and dwarf, seldom reaching more than one foot in height. It has a beautiful, dense dark green foliage and from early winter to spring is covered with such a profusion of lovely, purplish blossoms that the foliage is practically obscured. It is not unusual to see this brave little plant blossoming through the snow. Being a winter bloomer, hardy, equally good for rockeries, borders, groups and masses, it should be included in every planting.

## **Ilex aquifolium** (French Type of English Holly)

A large holly of thrifty growth. Full branches, has large, rich green leaves and bears bright red berries of large size in abundance. One of the best of hollies, and a holly which one would make no mistake in planting where holly thrives or is desired. Very valuable both for ornamentation and for commercial use where the foliage and berries are wanted for Christmas or other decorations. The best commercial strain having good keeping qualities and heavy berries. Self-fertile.

## Ilex aquifolium aureoregina (Golden Queen Holly)

Probably the most beautiful of all hollies. Foliage large, broad and glossy. It is golden variegated to such an extent that the entire tree appears golden. In winter season this shades into a fascinating pink. Berry-bearing type. Rare.

**Rooted cuttings, not transplanted. (Ready spring shipment)**

..... 15 113

**Ilex aquifolium pyramidalis** (Pyramid Holly)

A pyramidal type of English Holly. Grows into a well-formed tree, with good foliage. A most prolific berry bearer, the bright red berries often borne in solid mass along the stems. Furthermore, this tree is an early bearer, small trees often being laden with fruit, and in this characteristic of fruiting at an early age, meets a long felt need, where small trees are desired for decorative purposes. It is possibly the best holly for landscape purposes. Self-fertile.

**Rooted cuttings, not transplanted. (Ready winter shipment)**

..... 10 90

**Ilex crenata** (Japanese Holly)

Small, smooth, dark green leaves, resembling box. Has black berries, much branched shrub of irregular growth, 5 to 6 feet tall. Useful for its foliage. Fine hedge subject. Native of the Orient.

1- 2 inches once transplanted.....	6	45
2- 4 " " " .....	7	53

## **Ilex parneyi (Parney Holly)**

Semi-dwarf, heavily foliaged, broad leaf evergreen. Leaves are very prickly. Bears red berries in profusion. Hardy.

**Pinus montana mughus compacta** (Mugho Pine)

A dense, stout dwarf evergreen, of unquestionable hardiness. Coming from the high mountains of central Europe it has been dwarfed as trees frequently are that are storm swept for centuries along bleak coast lines or in rugged mountains, and only the hardiest and fittest survives. Such is the selected Mugho Pine, without a peer as a dwarf mountain evergreen. Mature trees reach a height of 4 to 5 feet but having a sprad of 6 to 8 feet. It grows with numerous branches and can be kept sheared to small size if desired. Very dense, compact and deep green summer and winter. Our trees are grown from selected seed of the best type.

1 inch not transplanted.....	.....	.....	2	15
------------------------------	-------	-------	---	----

**Pinus nigra** (Austrian Pine)

A stout, spreading, symmetrical tree with stiff dark green leaves 3 to 6½ inches in length. Reaches 100 feet in height. Native of south Europe and Western Asia.

1- 2 inches not transplanted.....	.....	.....	3	.....
-----------------------------------	-------	-------	---	-------

**Pinus pumila** (Dwarf Stone Pine)

Dwarf pine, irregularly branching and suggesting a creeping habit in form of growth. The foliage, which appears in dense clusters, clothes the tree with many needles, soft in texture and of delicate fresh green appearance throughout the season. Its appealing features may be summed up in three words—rare, hardy, beautiful. Native of Siberia.

**Rhododendron ponticum** (Pontic Rhododendron)

Hardy, vigorous grower. Large, glossy foliage. Pink to lavender blooms. The rhododendron is one of the most satisfactory of all shrubs. Besides its healthy, glossy foliage at all times, it provides the home with a luxuriance of blossoms that are a delight to all. Fits into practically all plantings, used either singly or in masses. Our lining out grades are fine sturdy little plants. This is one of our specialties which we grow in quantities, and have made the price correspondingly low.

Thuja occidentalis lutea (George Peabody Arborvitae)

A golden arborvitae of superior merit. It is a broad pyramid in form and shapely in type of growth. Has bright golden foliage, mingled with foliage the shade of old gold, producing an effective changing color scheme, varying with the point of view. A decidedly ornamental tree when rightly planted. Medium size.

4- 6 " " ".....	.....	.....	8	.....

Thuja occidentalis nana (Little Globe Arborvitae)

A dwarf of regular form. Foliage upright and grows in thick, heavy layers appearing to be packed together, and of good bright green color. Low growing, a mature tree reaching a height of two feet and spread of three feet, and presents an aged appearance. Desirable wherever dwarfs are needed.

Rooted cuttings, not transplanted. (Ready winter shipment)	.....	.....	6	45
--	-------	-------	---	----

Thuja occidentalis pyramidalis (American Pyramidal Arborvitae)

A most desirable arborvitae of narrow columnar growth, dense and compact without trimming. Very hardy and a favorite in almost any planting. Planted in groups it produces a most impressive alpine effect. In situations where effective hedges are desired requiring but little space, Pyramidal Arborvitae has no counterpart. The hedge becomes a solid wall of green from four to twenty feet in height and occupies no more than two feet in width. For hedges, trees should be planted one and one-half feet apart. No pruning is needed other than topping. A Pyramidal Arborvitae hedge requires scarcely any care.

Thuja occidentalis texana glauca (Blue Arborvitae)

A tree of rapid growth. Has a heavy, soft blue-green foliage of delicate, pleasing texture. Color the same all seasons of the year. Of general pyramidal form and very hardy. Lends itself well to shearing and is fine for hedges. Would add variety and color to landscaping effects. The beautiful, blue-green, feathery foliage of this tree, together with its graceful habit of growth should make it a universal favorite. Tree of medium height.

**Umbellularia californica** (California Laurel). Also commonly known as Oregon Myrtle.

Hardy evergreen, compact, leaves broad, dark green, flowers white. Foliage has strong, pungent, spicy fragrance. One of the beautiful native shrubs, found along the Pacific Coast.

4- 6 inches once transplanted.....	.....	.....	6	.....
------------------------------------	-------	-------	---	-------

**Vaccinium ovatum** (Evergreen Huckleberry)

First discovered by the Lewis and Clark expedition at the mouth of the Columbia river in 1805. One of the great beauties of the plant is the thick, waxy leaves, of blended shades of green in spring and summer, and changing to a mixture of deep crimson and bronze in fall and winter. It is a rounded plant, many branched and of unusual density. Strong, vigorous grower, and stands unlimited shearing. Can be sheared into a hedge from 1 to 5 feet tall. Does well in either sun or shade, but is at its best in sunny exposures. An evergreen shrub of surpassing merit and probably the finest of all hedge plants.

**Veronica hecknori**

A very unusual evergreen with russet green foliage in summer turning to a rich golden color in the winter season. The growth appears in the form of a multitude of symmetrical upright golden spikes, attaining a height of 12 to 15 inches. Makes a fascinating border or low edging plant, and could be used to advantage as a part of almost any low planting. It is a unique type. Hardy.

**Viburnum odoratissimum** (Sweet Viburnum)

Has evergreen leaves, resembling English Laurel, which turn to bright, beautiful shades of red in the fall. Fragrant white flowers.

2- 4 inches once transplanted.....	.....	.....	6	.....
4- 6 ...."....."	.....	.....	7	.....

5 of same variety and size at 10 rate; 25 at 100 rate; 250 at 1000 rate. B&B signifies balled and burlapped.

Native of China. The leaves are rough, evergreen, large and thick, and have a pleasing leathery appearance. Flowers yellowish white in enormous 8 inch clusters. It is, indeed a bold, handsome shrub, which gives an impression of stability and permanency.

Rapid growing, broad leaved evergreen, somewhat laurel-like in growth. Large clusters of pink and white flowers all winter.

This, like most viburnums has good foliage. The leaves are evergreen, large and glossy. Strong grower. Large flower clusters in great profusion. Decidedly a superior variety.

A native of the Cascade and Rocky mountains. Grows into a graceful symmetrical bunch in weeping form and might be described as a low fountain in grass, about eighteen inches high and two to three feet across. Out of the center of this grassy bunch grow the tall stems three to five feet in height and from one to as many as twenty in number, crowned with the long creamy-white lily heads of matchless beauty. The leaves which are grass-like are evergreen, and unusual as it may seem, it is an evergreen belonging to the lily family. Mountain slopes and meadows, clad in fields of these lilies are a thrilling picture, which once seen will never be forgotten. The grass is said to have been used by the squaws in early days in weaving baskets. Perfectly hardy, rather slow growing but long-lived. Should be planted in groups, and in the open where it is partially shaded during the day for best results. Will not bloom well if too shaded. The fine bunches of long, silky grass are very ornamental when the lily is not in bloom. A plant with a future, and rare in American gardens.
